ADVANCES IN PHYSICS

VOLUME 30

Editor
Professor D. H. Martin, B.Sc., Ph.D., F.Inst.P.

Editorial Board
Sir Nevill Mott, B. R. Coles, P. W. Anderson
P. Fulde, E. W. J. Mitchell, P. Nozières
C. Rizzuto, M. J. Seaton, A. Zawadowski

Published by
Taylor & Francis Ltd
4 John Street, London WC1N 2ET

Subscription Information

USA, Canada and Mexico (air freight): annual subscription (payable in advance), $240·00; per part $42·00 (surface post paid). Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Second class postage paid at Jamaica, New York 11431. USA Postmaster: Send address changes to *Advances in Physics*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. US subscribers should send order and cheque (in favour of Taylor & Francis Ltd) to Account 04 810 879 Bankers Trust Company, P.O. Box 9137, Church Street Station, New York, N.Y. 10049.

Japan (accelerated surface post): apply to exclusive agents, Kinokuniya Company Ltd, Odakyu West-Shinjuku Building, 47–1 Hatsudai 1-chome, Shibuya-ku, Tokyo 151. Telex 2322535.

FR Germany (surface post): annual subscription (payable in advance), DM 352·00; per part DM 63·00. Subscribers in FR Germany should send order and cheque (in favour of Taylor & Francis Ltd) to Account No. 073/6686, Deutsche Bank AG, BLZ 500 700 10, Postfach 2623, Rossmarkt 18, 6000 Frankfurt/Main 1.

UK and the rest of the world (surface post; accelerated surface post to Australasia; air freight to India): annual subscription (payable in advance), £80·00; per part £15·00 (surface post paid).

Published bi-monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK. Telex 858540.

Printed by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

© 1981 Taylor & Francis Ltd. ISSN 0001–8732.

CONTENTS

	Page
Articles published in Volumes 25–29	i–iv
^{3}He–^{4}He quantum solutions. E. P. Bashkin and A. E. Meyerovich	1
Physics of ultra-pure germanium. E. E. Haller, W. L. Hansen and F. S. Goulding	93
Intercalation compounds of graphite. M. S. Dresselhaus and G. Dresselhaus	139
Quantum field theory, horizons and thermodynamics. D. W. Sciama, P. Candelas and D. Deutsch	327
Theory of the pressure broadening and shift of spectral lines. G. Peach	367
Optically detected magnetic resonance (O.D.M.R.) investigations of recombination processes in semiconductors. B. C. Cavenett	475
The Boltzmann-equation description of transport in superconductors. A. G. Aronov, Yu. M. Gal'perin, V. L. Gurevich and V. I. Kozub	539
Luminescence and recombination in hydrogenated amorphous silicon. R. A. Street	593
Are there acoustic plasmons? J. Ruvalds	677
Dynamic non-linear optical processes in semiconductors. A. Miller, D. A. B. Miller and S. D. Smith	697
Theory of electron spin resonance of magnetic ions in metals. S. E. Barnes	801

CONTENTS OF VOLS. 25–29

VOLUME 25

	Page
Waves and Thom's theorem. M. V. Berry	1
Quantum theory and molecular structure. R. G. Woolley	27
Electron energy loss studies in solids; The transition metal dichalcogenides. M. G. Bell and W. Y. Liang	53
Theoretical and experimental studies on one-dimensional magnetic systems. M. Steiner, J. Villain and C. G. Windsor	87
The generation of coherent submillimetre waves. D. H. Martin and K. Mizuno	211
Interionic potentials in alkali halides and their use in simulations of the molten salts. M. J. L. Sangster and M. Dixon	247
Statistical theory of nucleation, condensation and coagulation. K. Binder and D. Stauffer	343
Luminescence in amorphous semiconductors. R. A. Street	397
The atmospheres of the outer planets. G. E. Hunt	455
The determination of the dynamic structures of atoms and molecules using the (e, 2e) reaction. I. E. McCarthy and E. Weigold	489
The use of Langmuir probes in the study of high pressure plasmas. P. R. Smy	517
Electrons in bismuth. V. S. Édel'man	555
Ginzburg–Landau theory of phase transitions in pseudo-one-dimensional systems. W. Dieterich	615

VOLUME 26

Recombination-enhanced defect reactions. Strong new evidence for an old concept in semiconductors. P. J. Dean and W. J. Choyke	1
Light absorption in antiferromagnets. V. V. Eremenko and E. G. Petrov	31
The use of synthetic membranes in biophysical research. R. H. Tredgold	79
Interstellar grains. The interaction of light with a small-particle system. D. R. Huffman	129
Charge perturbations around impurities in metals. G. Grüner and M. Minier	231
Scattering theory of defects in crystals. R. Rennie	285
Vibrational properties of elemental amorphous semiconductors. D. Beeman and R. Alben	339

Page

Silicon dioxide and the chalcogenide semiconductors; similarities and differences. N. F. MOTT 363

Spin susceptibilities and the theory of itinerant-electron antiferromagnetism. N. A. CADE and W. YOUNG 393

Metamagnetism. E. STRYJEWSKI and N. GIORDANO 487

Electronic structures of Mott insulators. B. H. BRANDOW 651

Editorial: Professor Sir Nevill Mott, Nobel Laureate, 1977 809

Doped amorphous semiconductors. W. E. SPEAR 811

Band structure of transition metal compounds. J.-L. CALAIS 847

Triboluminescence. A. J. WALTON 887

VOLUME 27

Excitons in rare-gas crystals. I. YA. FUGOL' 1

Transformation methods in the analysis of series for critical properties. C. J. PEARCE 89

Conductivity of quasi-one-dimensional metal systems. A. A. ABRIKOSOV and I. A. RYZHKIN 147

Theory of the coupling between conduction electrons and moments of 3d and 4f ions in metals. L. L. HIRST 231

Dielectric theory of elementary excitations in crystals. W. HANKE 287

Charge-density waves and isotropic metals. A. W. OVERHAUSER 343

Recent progress in thin-film solar cells. J. I. B. WILSON, J. MCGILL and D. WEAIRE 365

The extraction of spectral parameters in photon-correlation spectroscopy. C. J. OLIVER 387

The study of solid surfaces by electrochemical methods. H. GERISCHER, D. M. KOLB and J. K. SASS 437

The effects of core structure on radiative and non-radiative recombinations at metal ion substituents in semiconductors and phosphors. D. J. ROBBINS and P. J. DEAN 499

Light-scattering studies of the dynamical behaviour of liquid ^{4}He close to the λ-line. W. F. VINEN and D. L. HURD 533

The description of the physical properties of condensed matter using irreducible tensors. J. JERPHAGNON, D. CHEMLA and R. BONNEVILLE 609

The radio-frequency size effect: A tool for the investigation of conduction electron scattering in metals. D. K. WAGNER and R. BOWERS 651

Dispersive (non-Gaussian) transient transport in disordered solids. G. PFISTER and H. SCHER 747

Page

Heavily doped semiconductors and devices. R. A. ABRAM, G. J. REES and B. L. H. WILSON 799

The calculation of intermolecular forces. A critical examination of the Gordon–Kim model. M. J. CLUGSTON 893

Critical point behaviour and probability theory. M. CASSANDRO and G. JONA-LASINIO 913

VOLUME 28

Magnetic properties of liquid metal alloys. N. H. MARCH and C. M. SAYERS 1

Amorphous arsenic. G. N. GREAVES, S. R. ELLIOTT and E. A. DAVIS 49

The nature of the liquid–vapour interface and other topics in the statistical mechanics of non-uniform, classical fluids. R. EVANS 143

The Fermi gas model of one-dimensional conductors. J. SÓLYOM 201

Nuclear magnetic resonance in rare earth metals. M. A. H. MCCAUSLAND and I. S. MACKENZIE 305

Theory of defects and defect processes. A. M. STONEHAM 457

Bulk hot-electron properties of cubic semiconductors. C. JACOBONI and L. REGGIANI 493

Electrical properties of unusual ionic melts. F. HENSEL 555

Properties of ordered, continuously degenerate systems. V. L. POKROVSKY 595

Pressure as a parameter in the study of dilute magnetic alloys. J. S. SCHILLING 657

Metal colloids in ionic crystals. A. E. HUGHES and S. C. JAIN 717

Summary: Dislocation motion and high temperature plasticity of binary and ternary oxides. T. BRETHEAU, J. CASTAING, J. RABIER and P. VEYSSIÈRE 829

Mouvement des dislocations et plasticité à haute température des oxydes binaires et ternaires. T. BRETHEAU, J. CASTAING, J. RABIER et P. VEYSSIÈRE 835

VOLUME 29

Structural phase transitions

I. Landau theory. R. A. COWLEY 1

II. Static critical behaviour. A. D. BRUCE 111

III. Critical dynamics and quasi-elastic scattering. A. D. BRUCE and R. A. COWLEY 219

Structural properties of ionic liquids. J. E. ENDERBY and G. W. NEILSON 323

Polymers as electronic materials. J. MORT 367

Deep levels in semiconductors. M. JAROS 409

Page

Theoretical models for superionic conductors. W. DIETERICH, P. FULDE and I. PESCHEL 527

Erratum 607

Thermal expansion of solids at low temperatures. T. H. K. BARRON, J. G. COLLINS and G. K. WHITE 609

Magnetoelectric effect in antiferromagnetic crystals. O. F. DE ALCANTARA BONFIM and G. A. GEHRING 731

Scattering of electrons by atoms. J. CALLAWAY 771

Spin glasses with short range interaction. A. A. ABRIKOSOV 869

Contact electrification. J. LOWELL and A. C. ROSE-INNES 947
